INTERNSHIP

MERN Stack Development Intern (ALGO TUTOR) - Completed a MERN Stack Development Internship at AlgoTutor Academy, where I gained hands-on experience in building full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Worked on real-time development projects involving frontend-backend integration, RESTful API development, and database management. Applied modern web development practices to design responsive and scalable applications while enhancing problem-solving, debugging, and software development skills. Successfully collaborated in a project-oriented environment to deliver efficient and user-focused web solutions.

PROJECTS

Internet Speed Test: Built a Python-based Network Performance Monitoring Tool using Tkinter, Speedtest, Matplotlib, and SQLite to measure download speed, upload speed, and latency in real time. Integrated data visualization, performance analytics, and historical trend tracking for network reliability assessment.

Smart Loan Approval And Credit Scoring System: Developed an AI-driven Loan Approval and Credit Scoring System to evaluate applicant eligibility using financial and credit-related parameters. Implemented data analysis, predictive modeling, and risk assessment techniques to automate loan approval decisions and improve accuracy. Integrated a structured database for efficient customer record management and real-time credit score evaluation. Enhanced decision-making efficiency by reducing manual processing time and improving reliability in credit risk assessment.
